

4TH ANNUAL PRODUCTION SALE

FEB. 13, 2022 AT 1:00 PM- CRESCO, IA

Simmental and SimAngus™ Genetics

Oak Meadow Farms

Sale Schedule

Saturday, February 12, 2022

Cattle on Display 1:00 - 5:00 pm

Sunday, February 13, 2022

Cattle on display beginning at 9:00 am

Lunch served at 11:30 am

Sale Begins at 1:00 pm CST

Sale Location

Howard County Ag Education Center

220 7th St W - Cresco, IA 52136

Cattle will be onsite beginning Saturday, February 12, 2022.

Some of the bred heifers may be left at their respective farm in the event they appear to be close to calving.

Sale Updates

Please visit the Oak Meadow Farms or Innovation AgMarketing, LLC Facebook Page for sale updates and announcements. In the event there is a snowstorm or winter weather advisory, we will make announcements regarding the start time of the sale.

Supplement Information

A supplement sheet will be posted at DVAuction.com with ultrasound data and scrotal measurements. Additionally, the supplement sheet will outline special terms & conditions and/or retained semen interest in any of the bulls selling.

OME

Oak Meadow Farms

Friends,

The Aggen, Bigalk, and Seinola families would like to wish you a warm welcome to the Fourth Annual Oak Meadow Farms Production Sale. We are once again excited to have produced a set of bulls that are backed by the hard-working females that make up our respective programs. As breeders we have been diligent in our genetic selection and are dedicated to producing healthy, high-quality Simmental and SimAngus beef cattle. We take our role as your seedstock provider very seriously and will continue to make genetic investments annually to improve the product we offer.

Now more than ever quality genetics and customer service are a must. One example is our popular Oak Meadow Farms influence customer appreciation feeder calf sale held every November. We appreciate and value the relationship we have with Joe Nelson and the industry leading commission firms that he and his family operate in Lanesboro, MN and Decorah, IA.

The cattle in this offering excel in their physical traits and have strong EPD's and Indexes with the common goal of customer success. We welcome you to join us on February 13th at 1 PM for our Fourth Annual sale that will be held in Cresco, Iowa at the Howard County Ag Education Center. The sale will be a video auction in the comfort of the state-of-the-art climate controlled building. We will have videos of the entire offering and welcome you to stop by the farm prior to the sale. The sale cattle will be on display the day before the sale and sale day for your inspection as well. Please feel free to call or text us to discuss the offering, thank you for your interest!

INNOVATION

— AgMarketing, LLC —

Welcome,

The Oak Meadows Farms name has been a household commonplace for many years in the upper Midwest, and the Aggen family has more than etched their place in stone within the Simmental breed. It is our privilege to welcome you to the 2022 edition of the Oak Meadow Farms Production Sale. It is an honor for the Innovation AgMarketing team to be involved and represent this salt of the earth, multi-generational family owned and operated seedstock operation.

The Aggen family has always been concerned with providing their customer base the best seedstock for them to utilize in their commercial programs. Dr. Lynn Aggen serviced many bull customer operations during his 47 year tenure as an acclaimed veterinarian, allowing him to report back to upper management the positives and negatives. This constructive feedback allowed for faster paced improvement to meet their customer's needs.

There is no denying that the most essential trait for a commercial program's profitability has remained performance from birth to the weaning pen, and for this reason the mature cow size on the farms has been maintained at the upper threshold for this necessary trait. This set of bulls will contribute to any outfit's bottom line, regardless of your production goals. The cattle that have made the sale offer the necessary performance, visual eye appeal, and longevity that you can hang your hat on. Over the year's Oak Meadow Farms has diligently worked to improve the cattle numerically, so that the performance is balanced with sensible birthweights and improved carcass merit.

Seedstock operations over the years have looked to the Oak Meadow Farms program for their elite herd sire prospects, knowing that the fundamentals are all inclusive and that the EPD values have been maintained at a level that these cattle can and will benefit the respective programs that they go to work for. OMF Epic E27 and his most notable son, OMF Hard Right H21 have been the latest of the standouts that have originated at this Harmony, Minnesota based program. On February 13th several Epic sons will be offered, along with maternal brothers to Hard Right that highlight the bull offering.

A trio of maternal sisters to Hard Right lead off the deepest offering of bred females being made available to date. Countless females have left the pastures of Southeast Minnesota to work in many elite programs and progressive commercial operations alike. There has been and always will be substantial selection pressure placed on this program for the simple fundamentals like feet, structure, fertility, milk, and then the add-ons have allowed for refined sorting to take place.

Consider this your personal and exclusive invitation to joins us for the Annual Production Sale for Oak Meadows and their associates, Five Star, and Diamond K Simmentals. The sale facility is climate controlled and viewer friendly even when the weather may not be. See you at the sale!

Enjoy the cattle,

Graham Blagg

HERD HEALTH

All animals selling are tested negative for BVD-PI. Bred females are vaccinated with scour guard. All 3 herds have an extensive Johnes testing program, and have complete vaccination programs supervised by Dr. Lynn Aggen. In the event any of the bred heifers appear to show immediate signs of calving, they will be left at the farm in Harmony, Minnesota. Many are due on or around sale day.

BULL GUARANTEE

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the American Simmental Association, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

VOLUME DISCOUNT

A 5% discount will be given on the purchase of 5 or more bulls.

TERMS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed. Sale will be available to registered bidders via the Internet at DVAuctions (www.dvauction.com) to accommodate both local and distant individuals who cannot attend in person. They provide a real-time internet broadcast during the sale. All absentee bidding will be done via internet to a ringside sale representative. Please register for bidder number at dvauction.com anytime prior to 12 Noon on Friday, February 11th to accommodate the approval process. After this date/time, bidder approval may be delayed. Approved bidders will be issued bidder number and access prior to the sale. For questions or sale bookings call Office M-F 8am-6pm CT: (402) 316-5460

SEMEN INTEREST

Seller retains 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block.

RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction.

INSURANCE

James Bessler: (815) 762-2641

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

BOARDING

Bulls will be wintered at no additional charge until April 1, 2022. Bulls will have passed a thorough breeding soundness exam prior to pick up/delivery. Since each animal becomes the risk of the purchaser as soon as sold, we strongly recommend a mortality insurance policy be taken out on any animal that is left to be wintered. Any bulls left past April 1, 2022 will incur a \$3/Day feed charge.

ANNOUNCEMENTS

Announcements from the auction block will precedence over statements in catalog. Disclaimer: The information in this catalog is subject to change.

TRUCKING

Free delivery on all bulls within a 250-mile radius of the sale. In the event you have a further distance to travel we will assist in the coordination of your animals delivery. Here is a trucking contact that we strongly recommend. Dick Coleman (765) 461-0954

ONLINE BIDDING

We are pleased to bring you real-time internet bidding and a live broadcast of this sale through DVAuction.com. If you are unable to attend for any reason, you may bid online at dvauction.com. Please register for bidder number at www.dvauction.com anytime prior to 12 Noon on Friday, February 12 to accommodate the approval process. After this date/time, bidder approval may be delayed. Approved bidders will be issued bidder number and access prior to the sale. For questions or sale bookings call the Office M-F 8am-6pm CT: (402) 316-5460.

From Our Customers

"We first introduced Oak Meadow Farm genetics into our program 10 years ago, with the purchase of the lead off bull in their Reserve Champion Percentage pen of bulls. We followed up for several years after that selecting open heifers from OMF to build our registered herd. We continued to purchase OMF sires to use on these OMF females to grow our herd.

These genetics really clicked with our program and advanced the quality of our cattle. Our private treaty bull sales continue to grow, as well as the bred female offering. These cattle run on a rotational grazing and hay program in Central Minnesota and thrive in this environment. We feel the docility, growth, and efficiency of our herd stems from the strong OMF genetics that we have been using.

Although we use extensive AI, we continue to run OMF bulls on our cows and often find these OMF sired calves stack right up with the AI calves. The confidence we have in their program lead us to another great purchase in the 2021 sale, OMF Holler H23."

-Randy Roberts, RR19 Ranch, Bluffton, Minnesota

"I have always admired the bulls the Matt Aggen has brought to Denver. We had the opportunity to purchase a son of his Hook's Angel 11A donor last year. We made the purchase sight unseen, and everything was exactly the way Matt represented the bull. He has been good breeding bull with strong libido, and we plan to collect him this spring."

-Zach Kearns, Kearns Cattle Company, Rushville, Nebraska

A GUIDE TO EXPECTED PROGENY DIFFERENCES

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

- **Calving Ease (CE):** Percent of unassisted births when used on heifers.
- **Birth Weight (BW):** Pounds of birth weight. Calving Ease (CE): Percent of unassisted births when used on heifers.
- **Weaning Weight (WW):** Pounds of weaning weight.
- **Yearling Weight (YW):** Pounds of yearling weight.
- **Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.
- **Milk (MLK):** Pounds of weaning weight due to milk.
- **Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.
- **Stayability (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.
- **Carcass Weight (CW):** Pounds of carcass weight.
- **Yield Grade (YG):** Yield grade score.
- **Marbling (MRB):** Marbling score.
- **Back Fat (BF):** Inches of backfat.
- **Ribeye Area (REA):** Square inches of ribeye.
- **All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)
- **Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well- conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes: All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

The Bulls

OMF JACK J45

LOT 1

We initiate the 2021 offering with a maternal brother to the \$60,000 OMF Hard Right H21 that is sired by the \$205,000 W/C Bankroll 811D. The dam of OMF Jack J45 is the immortal Hook's Angel 11A, who has become a staple in the donor pen at Oak Meadow Farms. A full sister J45, OMF Honesty h48, leads off the bred heifer division of this year's offering. OMF Jack J45 offers the same rugged build and herd sire look that his maternal brother was praised for. OMF Jack J45 offers more than just an impressive phenotype as he charts among the top 25% of the breed for CE, BW, MCE, Milk, Stay, YG, Marb, REA, API and TI. This homozygous black and homozygous polled herd bull candidate is one of the best to every carry the OMF prefix, and we are confident that the maternal support staff that lines his pedigree will allow him to positively impact the next generation of SimGenetic seedstock. *Member of the NWSS Pen of Three.*

LOT 2

OMF Junior J42 is the homozygous black and homozygous polled her bull candidate that leads off the popular OMF Epic E27 sire group. There is no question that Epic has experienced heavy use across the business and his popularity continues to surge as breeders begin to have their first Epic calves hit the ground. J24 offers the extra stout and rugged build at the surface, while maintaining an athletic stride when set into motion. He was raised by a tremendous two-year-old dam that we have very high hopes for. OMF Junior J42 offers an elite spread from birth to weaning and continues with a performance-oriented trend to a year. J42 charts among the top 25% of the breed for CE, BW, WW, YW, ADG, MCE, MWW, and TI. We have admired the genuine build and bold body shape that he exemplifies. J42 reminds us of his sire at this age, with a shot more center body depth and dimension. His service will be utilized in the Oak Meadow Farms program moving forward.

The trend continues with another standout son of OMF Epic E27 that is backed by a tremendous two-year-old dam. OMF Jazz J18 is an elite calving ease sire option that charts among the top 4% for CE and top 1% for BW. He is a stylish, smooth made, sound footed herd bull prospect that also is among the top 10% of the breed for Marb, REA, Shr, and API. J18 is the number one calving ease option of his contemporary as he offers a sensible 69-pound birth weight and a BW Ratio of 74. He is a homozygous black and homozygous polled bull that we will most certainly use back in herd on virgin heifers as a sleep all night calving ease sire. His dam by CCR Boulder 1339A has an exemplary udder design and phenotype. She maintained flesh while bringing J18 to the weaning pen with an adjusted weaning weight of 742 pounds.

OMF/DKSM Jumble J80 is one of the true standouts of the 2022 offering. We have always admired his genuine mass, width, and square build. Jumble is a flush mate brother to a trio of bulls that sold in 2021 and averaged north of \$5,000 per head. J80 is a top performance bull that charts among the elite 1% of the breed for WW and MWW. He adjusts with an impressive weaning weight north of 1,000 pounds! J80 is a powerful herd bull option that will add pay weight to his calves without sacrificing eye appeal or structural integrity. A sale highlight.

The next set of brothers are derived from the Diamond K Simmental donor dam that was produced in the Triangle J Ranch program, 701D. This TJ Main Event 503D daughter that traces to the influence of the SAV Final Answer 0035 sired daughter of the proven TJ 14M, a female that has recorded over 60 progeny with the American Simmental Association Herdbook. Consistency counts and this set of brothers are from a proven and reliable cow family. 8J is a double black and double polled three-quarter blood SimAngus that charts among the top 25% of the breed for BW, WW, YW, MCE, Stay, CW, REA, API, and TI. He ranks top 1% of the breed for Milk and MWW. A logical herd bull option if you plan to retain females in herd.

THE COWBOY CUT SIRE GROUP

LOT 20

Hook's Angel 11A does it yet again! We love the consistency that 11A offers across a wide array of sire options, and the fact that she injects so much quality and functionality into her ET progeny. We initiated the sale offering with a maternal brother sired by W/C Bankroll 811D, and we start the CCR Cowboy Cut 5048Z sire group with yet another 11A son that we believe has the credentials to work for either a seedstock or a top tier commercial outfit. Study his video and we think you will appreciate the rugged build, flexibility, and masculine herd sire look that he portrays. He charts top 15% for CE, top 20% BW, top 10% MCE, top 10% Stay, top 10% Doc, top 3% Marb, top 2% API, and top 5% TI. His genomically enhanced predictors indicate that he is a suitable option for use on heifers or cows and will certainly not sacrifice pay weight at weaning. The maternal influence of 11A is strong, help yourself to a maternal brother to OMF Hard Right H21, our lead off bull in 2021.

HOOK'S ANGEL 11A | DAM OF LOT 20

LOT 21

OMF HARD RIGHT H21
\$60,000 MATERNAL BROTHER TO LOT 20

OMF Jethro J70 is a full brother to OMF Home Grown H26, a sale feature in 2021 that was purchased by one of our great customers, Shane Gavin of Lansing, Iowa. J70 is a homozygous black and homozygous polled Purebred that is backed by the OMF Umbelina U9 influence on the maternal side of his pedigree. He boasts an impressive adjusted weaning weight of 973 pounds with a WW Ratio at 116! He is the number 1 weaning weight bull of his natural calving contemporaries, while ranking in the top 25% or better for 11 traits!

The next trio of ET flushmate brothers are sure to draw attention from the most discriminating cattlemen due to the combination of form and function that they present. Five Star Jaws J28 is the lead off son from the BCLR Manifesto G352 x Five Star Sheila C1 flush. J28 is the homozygous black and homozygous polled Purebred that charts among the elite 1% of the breed for WW, MWW, and TI. He is among the top 25% of the breed for ADG, Milk, MWW, Doc, CW, Marb, and API. A true standout that is a direct result of a maternal excellence that stems from the influence of the foundation matriarch, OMF Shenna Mark Y1. A Maternal brother to this set of brothers topped the inaugural Oak Meadow Farms production sale.

Five Star Jet J27 is the third brother from the powerful Manifesto flush that is backed by the foundation matriarch, Five Star Sheila C1. In 2021 a maternal brother, Five Star Hefty H11, sired by WS All Aboard B80 was a sale highlight. A full sister to H11, Five Star Happi H23, is one of the featured lots in the bred heifer division this year. J27 ranks among the top 25% of the breed in 9 traits. The influence of Five Star Sheila C1 continues to be dominant year after year!

THE CDI TRUSTEE SIRE GROUP

LOT 28

OMF Jester J47 is a member of our National Western Stock Show Pen of Three. He is sired by CDI Trustee 387F and backed by a productive young daughter of CCF Boulder 1339A. His genomically enhanced data is highlighted by his top 15% rankings for WW, YW, Milk, MWW, Marb, REA, and TI. J47 is one of the heaviest weaning bulls in his contemporary group with a 917-pound adjusted weaning weight and a WW Ratio at 109. We have always admired J47 for the rugged and masculine herd bull look at the portrays.

CDI TRUSTEE 387F | SIRE OF LOT 28-32

LOT 29

OMF Journal J72 is the CDI Trustee 387F son that is backed by the prolific Hook's Angel 11A matron, a female that is responsible for the Lot 1 bull the last two years, as well as the lead off bred heifer in this year's offering. 11A plays a pivotal role at Oak Meadow Farms, and her influence will continue to impact future generations of SimGenetic cattle. OMF Journal J72 is much like his \$60,000 maternal brother, OMF Hard Right H21, in terms of density, thickness, and center body dimension. We appreciate the foot shape, depth of heal, and quality of structural build that J72 brings to the table. He charts top 5% of the breed for YG, Marb, and API. He offers balanced genomics from birth to a year and maintains excellent carcass figures across the board. OMF Journal J72 was Hook's Angel 11A's natural calf this year and she did an exceptional job once again. He offers a 900 plus pound adjusted weaning weight with a WW Ratio at 107. Herd bull alert!

OMF Jaguar J49 is a MATERNAL BROTHER to the ST Genetics line-up super star, OMF Epic E27, that is owned by Schooley Cattle and Little Shasta Ranch. There is no question that Epic has experienced heavy use across the industry, and the demand continues to surge. Jaguar is sired by CDI Trustee 387F, also a familiar name on the ST Genetics roster. He offers balanced data across the board and maintains top 35% status in 8 traits. J49 was OMF Time Less B100's natural calf last year. He boasts an impressive 885 pound adjusted weaning weight and a WW Ratio at 105. J49 further solidifies his herd sire candidacy by being homozygous black and homozygous polled. Here is a bull with a unique pedigree that offers an elite phenotype and balanced set of genetic predictors.

J2 is a powerhouse of a Purebred herd sire prospect. He is rugged, masculine, deep bodied, big testicled, and square ended. We love the loose build and body style that he represents. J2 is another Trustee son that is backed by a maternal sister to the great OMF Epic E27. By combining the strong maternal influence of OMF Time Less B100 with the power and fleshing ease and durability of CDI Miss Hometown 163C, OMF Justice J2 becomes a frontrunner for any program looking to enhance the maternal aspect of their cowherd. J2 is one of the elite carcass merit sires in the entire offering. He charts top 1% YG, top 1% REA, top 10% BF, top 15% TI, and top 25% Marb. He recorded an adjusted weaning weight of 857 pounds with a WW Ratio at 102.

OMF Jones J65 is standout from the CDI Trustee 387F sire group. He is a homozygous black and homozygous polled three-quarter blood SimAngus that is backed by the influence of the everlasting T60 cow family, a genetic line that has been instrumental in the forward progression of all three programs associated with this production sale. J65 ranks top 5% of the breed for 6 traits of importance, and top 25% for an additional 4 traits. He is a big spread option that offers a BW of 82 pounds with a BW Ratio at 88 and an adjusted weaning weight of 881 pounds with a WW Ratio at 105. We admired J65 for the genuine power, substance, and skeletal quality that he personifies. A true sale highlight that is a must see to appreciate the unique breeding pieces that he can contribute.

OMF Josey J28 is the lone son of CDI Mainline 265D on offer this year. In 2021 a son of Mainline was the second high selling bull at \$12,500. J28 brings forward the fundamentals that we have come to appreciate from this sire group. He is big ribbed, thick ended, wide topped, and south footed. J28 is balance numerically while offering an adjusted weaning weight of more than 760 pounds. A maternal brother was purchased by Nagle Farms, while several maternal sisters have either been retained in herd or marketed through past production sales. Here is a big bodied, efficient SimAngus bull that will leave behind an excellent set of daughters.

LOT 32

THE SON OF FIRESTEEL

LOT 34

EGL Firesteel 103F was the \$85,000 high seller in the 2019 Eagle Pass Ranch Bull Sale that was purchased by several top outfits in the business and used exclusively by ownership for the first year. Five Star Ranch selected Firesteel semen when it came available and quickly flushed the prolific AHB Cortney 553C matriarch to the exciting half-blood sire. Five Star Juice J8 is the result of this flush and there is no question that this homozygous black and homozygous polled three-quarter blood herd sire prospect combines elite form with function phenotypically. J8 is a top heifer bull prospect in this year's sale as he ranks top 10% CE and top 15% BW. His genomically enhanced data also puts him in the top 10% of the business for YG, Marb, REA, and API. Five Star Hastings H19, a maternal brother to J8, sired by CDI Mainline 265D sold to Lonesome Dove Livestock in the 2021 sale for \$12,500. Other progeny from AHB Cortney 553C have been selected by Carter Lee, David Sexton, James Earley, RR19 Ranch, and Mark Kronebusch. Five Star Glory G19 is the most well-known sister of J8, she is the Turnpike daughter that is the next generation breeding piece at Five Star Ranch to carry on the 553C cow family.

OMF Honesty H48 is one of the most intriguing females that has ever been offered at Oak Meadow Farms, and there is no question that she is backed by the most elite and maternal lineage that calls home to Harmony, Minnesota. The dam of H48 is the prolific Hook's Angel 11A, making her a maternal sister to the \$60,000 OMF Hard Right H21. A full brother to H48 is the featured Lot 1 herd sire prospect, OMF Jack J45. Hook's Angel 11A exemplifies the fundamentals of beef cattle production, while still injecting the extra "bells and whistles" deemed necessary to be a breed enhancing individual. H48 is impeccable at the surface, as she offers exceptional foot size and shape, is flexible in her lower joints, and reaches with true athleticism. She sells safe in calf to OMF Epic E27, making the resulting heifer calf a three-quarter sister in blood to OMF Hard Right H21! H48 is the caliber of female that a cow family can be built around!
AI Bred on 4/26/21 to OMF Epic E27 (ASA: 3317371). No Exposure. Safe AI. Sexed Female Semen. *Seller retains the right to 1 successful with a minimum of 6 transferable embryos. Flush to be done at the buyer's convenience and seller's expense.*

THE BRED FEMALES

LOT 52

H61 and H67 are flushmate sisters sired by the \$71,000 Ruby's Turnpike 771E that has evolved as one of the great young breeding bulls in the business. This duo is backed by the prolific Hook's Angel 11A. A full brother to this pair of program building bred heifers was a featured Lot in our 2021 production sale when he sold to Kearns Cattle Company of Rushville, Nebraska for \$10,000. OMF Hele H61 is a bold centered, stout featured female that offers an elite number profile to compliment her added dimension. She ranks top 20% CE, top 25% YW, top 10% ADG, top 15% Milk, top 25% MWW, top 15% YG, top 10% Marb, top 10% API, and top 15% TI. OMF Harlee H67 offers the signature look of balance, style, and maternal excellence that 11A has become so widely known for. H67 ranks top 20% CE, top 25% BW, top 10% ADG, top 15% Milk, top 15% YG, top 10% Marb, top 10% BF, top 10% API, and top 20% TI. This pair of bred females would rank among the most unique bred females to ever be offered from Oak Meadow Farms. Both females were confirmed AI bred to OMF Epic E27 with sexed heifer semen. Epic is a leading member the ST Genetics line-up and has experienced tremendous use across the business. *Seller retains the right to 1 successful with a minimum of 6 transferable embryos. Flush to be done at the buyer's convenience and seller's expense.*

THE BRED FEMALES

LOT 55

Five Star Heartly H41 is a daughter of OMF Extra E73, the Executive Order sired son of Hook's Angel 11A. H41 is true standout among the offering that is backed by the influence of R&R Chamberlain X744 via RSF 517C, a top female produced in the Siek program. H41 offers a flawless look of maternal power from every angle. She is big footed, stout boned, wide based, and is square in her pin set. We love the natural outward curvature and dimension that she offers through the center portion of her body. She appears to be developing a near perfect udder design to compliment the feminine and ultra-maternal look that she personifies. Without question H41 is one of the premier bred females to ever carry the Five Star Ranch prefix, and she is certainly being offered with a bit of reservation. She is safe in calf to the \$85,000 Firesteel that will result in a three-quarter blood calf with an elite number profile with 8 traits among the top 25% of the breed! **AI Bred on 4/11/21 to EGL Firesteel 103F (ASA: 3498940). No Exposure. Safe AI. Seller retains the right to 1 successful with a minimum of 6 transferable embryos. Flush to be done at the buyer's convenience and seller's expense.**

Five Star Hope H10 is a homozygous black three-quarter blood SimAngus female that is backed by the everlasting influence of the great GLS/KB Finesse Y187, the matriarch of Five Star Ranch. H10 is sired by the late Remington Lock N Load 54U, one of the most influential sires in the breed. A full sister to H10 was the high selling female in 2019 when she sold for \$15,500 to the Kronebusch family. Y187 has been a staple in the donor pen, consistently producing progeny that command a premium and make a difference in production for the operations that have put their genetics to work.

AI Bred on 4/22/21 to W/C Night Watch 84E (ASA: 3336327). PE from 5/22/21 to 10/18/21 to ES HF145 (ASA: 3758212). Estimated Due 3/1/22.

OMF Hamber H90 is one of the most unique bred heifers to ever be offered from the OMF program in terms of stoutness of featured, uniqueness of foot and bone work, and quality of hip and hind leg design. We love the genuine mass, dimension, and squareness of build that she brings to the table. OMF Hamber H90 is extra big hiped and wide pinned. She is safe in calf to TJ Flat Iron 259G, the calving ease stud bred in the Triangle J Ranch program, for a quick return on investment. A must see on sale day! AI Bred on 5/13/21 to TJ Flat Iron 259G (ASA: 3582543). No Exposure. Safe AI.

LOT 69

DKSM Hailee 15H is an elite Purebred that offers breed leading genomics to compliment her added body depth and dimension. She charts among the elite 1% of the breed for CE, top 1% BW, top 3% ME, top 15% Marb, top 3% API, and top 20% TI. She is a homozygous black and homozygous polled female that sells safe in calf to ES HF145, a great built Boulder son that is backed by a full sister to the widely popular Right Time. Study the number profile of the resulting pregnancy, this mating will result in a high calving ease, low birth weight number profile that offers elite marbling and carcass merit that is homozygous black and polled by pedigree. AI Bred on 6/30/21 to ES HF145 (ASA: 3758212). PE from 5/21/21 to 10/21/21 to ES HF145 (ASA: 3758212).

OMF Hilde H12 personified the brood cow essentials of structural integrity, body mass, and fleshing ease. She is sensible in her frame side, big hipped, and robust in her rib cage. We love the maternal instinct and functionality that our OMF Commander Y69 daughters portray. This combined with the everlasting influence of the great OMF Elin X58 makes H12 a candidate for any progressive operation looking to build a program around a female with true maternal prowess. She sells safe in calf to G A R Ashland, with the resulting mating offering a number profile that is nothing short of elite. **AI Bred on 5/21/21 to GAR Ashland (AAA: 18217198).** No Exposure. Safe AI.

H118 is a dense bodied, good footed SimAngus granddaughter of CCR Boulder 1339A. Her dam is a top young female that is backed by the foundation breeding piece in the OMF donor pen, OMF Black Betty Y12. He charts top 20% CE, top 15% BW, top 15% Milk, top 20% YG, top 25% Marb, top 25% BF, and top 15% Shr. *AI Bred on 6/28/21 to OMF Effort E74 (ASA: 3317428). PE from 6/30/21 to 11/4/21 to OMF Hector H38 (ASA: 3790981).*

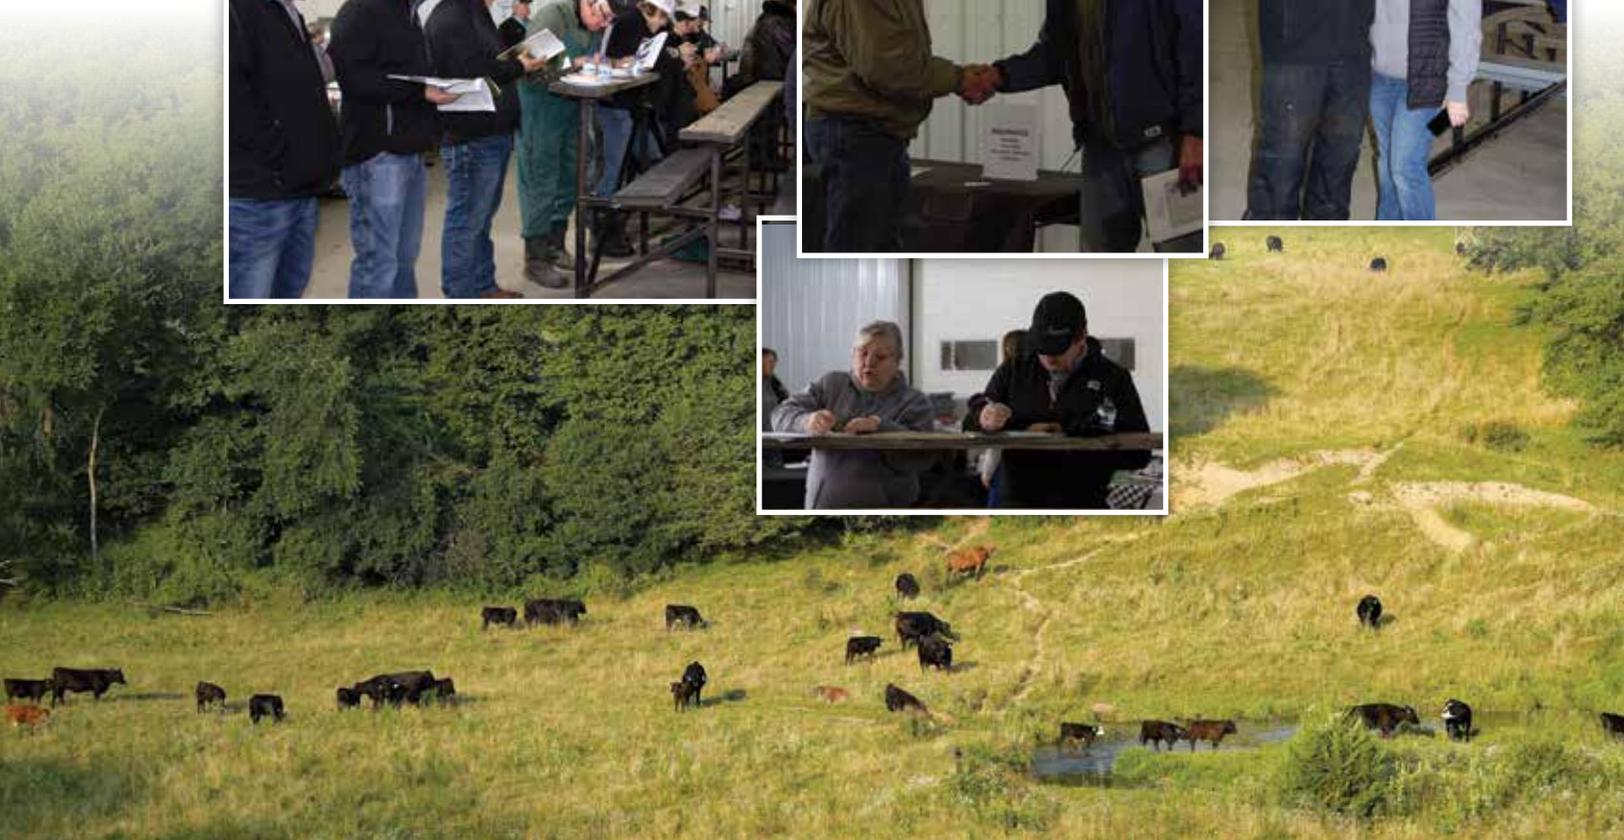

From Our Customers

"I'm sold on this program. The bulls are docile, have great libido and stay in excellent condition in the pastures. With these genetics, we've been able to add significant pounds without frame creep on the replacement females. I'd recommend Oak Meadow bulls to anyone."

-Pete Burmeister, Burmeister Farms, Rowley, Iowa

"We purchased OMF Hard Right H21 with CK Cattle from Oak Meadow Farms last year. We admired Hard Right phenotypically and were impressed with the genomics that he was able to combine with such a rugged and functional build. To say we are satisfied with how Hard Right has matured would be an understatement. His first calves are due this spring and we are anxious to see how he influences our program."

-Mike Hartman, Hartman Cattle Company, Tecumseh, Nebraska
